This Publication Is The Product of A Member of

Thus assuring you the ultimate service that skill and care can produce in the way of City Directories or other reference media.

The following "Standards of Practice," adopted at the inception of the Association of North American Directory Publishers in 1898, and strictly adhered to over the years, is your guarantee of a satisfactory Directory.

The publisher of a Directory should dedicate his best efforts to the cause of business uplift and social service, and to this end pledges himself:

1. To consider, first, the interest of the user of the book.

2. To subscribe to and work for truth, honesty and accuracy in all departments.

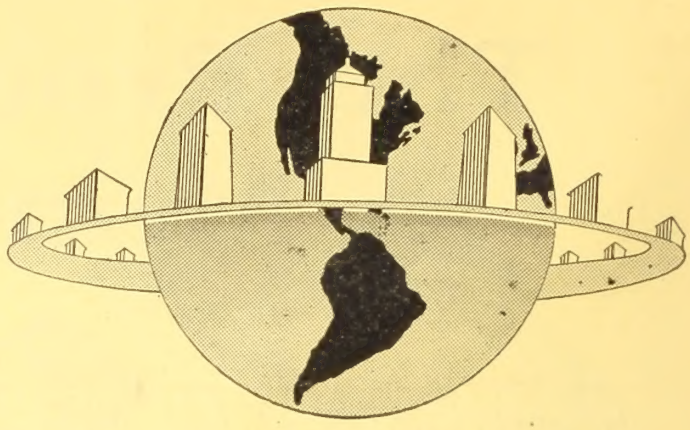
3. To avoid confusing duplication of listings, endeavoring to classify every concern under the one heading that best describes it, and to treat additional listings as advertising, to be charged for at regular rates.

4. To increase public knowledge of what Directories contain; to study public needs and make Directories to supply them; to revise and standardize methods and classifications, so that what is wanted may be most easily found, and the Directory be made to serve its fullest use as a business and social reference book and director of buyer and seller.

5. To decline any advertisement which has a tendency to mislead or which does not conform to business integrity.

6. To solicit subscriptions and advertising solely upon the merits of the publications.

7. To avoid misrepresentation by statement or inference regarding circulation, placing the test of reference publicity upon its accessibility to seekers, rather than on the number of copies sold.



8. To co-operate with approved organizations and individuals engaged in creative advertising work.

9. To avoid unfair competition.

10. To determine what is the highest and largest function of Directories in public service, and then to strive in every legitimate way to promote that function.

FOR some years the statistical analysis of the City Directory Department has forecast that the rate of increase in population of Toronto proper would diminish and that of the Suburban areas increase. Last year for the first time in history, the City Directory house-to-house survey showed a greater increase in population in the residential areas outside the City's limits than for the whole City proper. This year the increase in the area outside the City but contiguous to it, shows a population increase twice that of the City itself.

Why is the area outside the City growing so much more rapidly than the City itself? There are several reasons. First of all the density of population per acre in the City of Toronto is greater than any of the large Canadian or United States Cities listed in the graph herewith.

DENSITY OF POPULATION

Comparison of Toronto with some other Canadian and U.S. Cities.

City	Population*	Land Area in Acres	Population Per Acre
Toronto	716,798	21,759.4	32.9
Montreal	810,925	32,155	25.22
Winnipeg	217,587	14,865	14.64
Cleveland	900,430	45,064.5	19.98
St. Louis	821,960	39,040	21.05
Boston	781,188	27,634.8	28.27
Pittsburg	669,817	32,833.7	20.40
San Francisco	634,394	26,880	23.60
Milwaukee	578,249	23,428.2	24.68
Buffalo	573,076	24,894	23.02
Newark	442,337	15,084	29.32

In 87 years Toronto advanced in population from 19,706 to 716,798, an increase of over 3637 per cent., and is now the second City in Canada. In a ten year period, from 1905 to 1915, the increase was 253,786, or a growth almost equal to its total previous population.

ANNEXATION IMMINENT

The City evidently is becoming fairly well filled up and from past experience we believe these figures indicate that annexation of some areas adjacent to the City boundaries is not far distant. Another reason may be that in the development of practically all large Cities taxation per capita begins to climb as the City grows where it should naturally be expected to drop. This usually results in citizens looking to undeveloped areas outside the City where the rate of taxation may be at the moment lower, because of the fear of excessive future taxation. This fear, in the case of most large Cities, seems to be justified. Apparently the common law of municipal government is "The greater the City the greater per capita costs."

SCHOOL TAXES KILL GROWTH

It must be kept in mind that between 33 1/3% and 50% of the current revenue of the average municipality goes to Education. In municipalities and areas surrounding the City limits large numbers of families send their children to private schools. Public schools, therefore, are not as large an item in the expenditure of the taxpayer's money, with the result that per capita tax is comparatively low in these areas. Families who do send their children to private schools naturally gravitate towards these areas. Other families who use public educational institutions, because of low tax rate outside the City, move from the City to such special areas where they do not require to carry the burden of educational costs for the poorer districts.

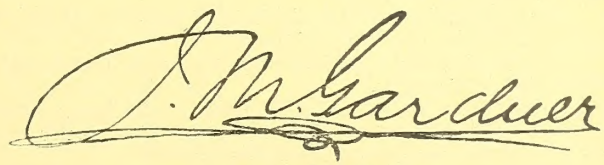
The 1932 house-to-house census again shows that the average family is larger in the areas outside the City limits. Cognizance has been taken of the fact that some areas of the City do show very large average family units. Other areas, however, more than make up for this condition.

The City Directory enumerators call at every home and place of business taking the names of persons in each home. Names of children together with the names of wives of householders and certain other classes of population are not printed, although included in the annual population analysis. Again this year practically two complete surveys have verified the surprising estimates appearing at the head of this page.

293,938 CHANGES

NEVER IN THE HISTORY OF ALMOST ONE HUNDRED YEARS OF DIRECTORY PUBLISHING IN TORONTO HAVE YOUR PUBLISHERS SEEN SUCH A TREMENDOUS CHANGE IN THE LISTINGS IN ONE YEAR'S TIME. In the Alphabetical Directory alone there are 219,165 changes. In the Classified Business Lists, 5,033, OR ALMOST ONE IN FOUR FIRMS LISTED. In the Street Guide and Home Owners' Directory there are 69,740 changes. One Public Utility Corporation, serving a big proportion of the homes in Toronto, claims that they in this one year have a record of over 58,000 changes of address in their records alone. The reason for this enormous switch-over apparently is to be found in the present business conditions with their attendant effect on the normal living conditions of the employees earning their livelihood from the industrial, commercial, financial or professional activities located in the City.

SIXTH CANADIAN MAIL REVENUE FROM TORONTO



It is estimated that the Toronto Post Office produces ONE-SIXTH OF THE TOTAL POSTAL REVENUE OF THE DOMINION OF CANADA.

So far the Toronto Post Office, under Postmaster W. E. Lemon, has carried on their usual efficient service except that they have been lately forced to return incompletely addressed mail to the sender instead of attempting to deliver it. Mail of this type, it will be noticed, is now returned to the sender.

Present conditions seem to have developed a carelessness in mail addressing which is the cause of this change.

MORE BUILDINGS GOING UP.

Building figures point to an ever-growing demand for additional accommodation of all kinds, to meet both housing and working needs. It would seem that Toronto need have no fear of over-development in this line, nor be in any danger of a surplus of vacant buildings. Actual figures since 1916 are:—

Year.	Permits Issued, No.	Buildings Erected No.	Value of Buildings Erected
1916	3,936	4,753	9,881,671
1917	4,467	5,400	7,163,556

TORONTO—FINANCIAL FACTS

Four of the ten Canadian Chartered Banks have their headquarters at Toronto.

The capital investment, including reserves, of the Toronto banks stands at over 140 millions.

Toronto has 294 banking offices, a larger number than any other city in Canada.

In addition to its banks, Toronto is the home of 24 Trust Companies, Mortgage and Life Insurance Companies, representing aggregate resources of over $500,000,000.

The total resources of all banks represented and doing business in Toronto are $3,133,030,468.

Although possessing only about 7% of the population of the Dominion, Toronto recorded approximately 20% of the $2,300,000,000 of subscription to Government loans issued for war purposes from 1915 to 1919.

BANK CLEARINGS.

Bank clearings have frequently been regarded as an indication of growth. While the clearings for 1922 were somewhat less than 1921, they show a substantial increase over 1919, and the whole trend for the past twenty years has been one long gradual rise. The figures are:—

1905	$1,047,490,701

1931	1,950,451	171,615	2,122,066

The enormous increase of the year 1931 over that of 1930 is accounted for by the opening of the new Welland Ship Canal, in spite of the fact that vessels passing through the Canal were restricted to a draught of 18 feet, and that it was a "difficult" year for steamship companies who had half of their fleets tied up for the whole year.

TORONTO—EDUCATIONAL FACTS AND SCHOOL STATISTICS

Toronto has 18 libraries—a Public Reference Library, a Central Lending Library, 36 St George Street (with Central Reading Room and Music Library on College Street), 15 Branch Libraries and a Boys' and Girls' House. The annual use of books for 1931 was 3,821,969 copies. Total books in all branches, 564,709

Toronto offers unusual educational, religious, recreational and home facilities to the working man; sane labor laws, honestly and ably administered, all result in satisfied and satisfactory employees.

TORONTO—INDUSTRIAL FACTS

Toronto manufacturers annually purchase raw material to the value of upwards of $340,000,000, a sum greater than in any other city in Canada.

There is more money invested in industrial enterprises in Toronto than the combined total industrial investments of the Provinces of Alberta, Saskatchewan, Manitoba, Nova Scotia, New Brunswick and Prince Edward Island.

Toronto has a greater amount of capital invested in manufacturing than the combined manufacturing capital of any other seven manufacturing centres of Ontario.

Toronto pays annually more than $140,000,000 in salaries and wages to her industrial workers; a greater amount than any other Canadian city.

Canada's export trade has increased from seventy-two millions in 1880 to $1,444,000,000 in 1930. On a per capita basis Canada stands first among the nations of the world in the matter of foreign trade, and fifth in total volume of trade.

INDUSTRIAL DEVELOPMENT

There are 2,350 manufacturing establishments in Toronto and suburbs. Toronto has more factories than any other city in Canada, twice as many branch works of British firms and three times as many branches of United States firms. The annual value of manufactured products exceeds $650,000,000. The capital invested in industries in Greater Toronto exceeds to $595,000,000. There are in the Toronto area approximately 109,000 industrial employees and the annual industrial payroll approximates $143,000,000.

Toronto is firmly established as Canada's leading industrial and distributing city. It is the immediate centre of the largest and wealthiest consuming population in Canada, and it is the centre also of Dominion-wide business and wholesale trade. It is also a favorable base for world-wide export trade, which is one of the outstanding features in Canadian industrial development.

The volume and diversity of Toronto manufactures provide plentiful and efficient labor, skilled and unskilled, male and female. Toronto has unrivalled distribution facilities in all directions, by rail, lake, highway and air, with complete linking up of these services. It is in close proximity to sources of raw materials. Splendid industrial sites are available in the harbor and other zones within the city limits and in its industrial suburbs. It has electric power at cost and it is one of the financial centres of the North American continent, providing ample financial facilities. It is a delightful city to live in, both for executives and for workers and their families.

The Toronto Industrial Commission is the official industrial commission for the City of Toronto. His Worship the Mayor is honorary president of the Commission and a member of its Executive Committee and Board of Directors. The offices of the Commission are in the Concourse Building, 100 Adelaide Street West, Toronto.

Many other statistics show how rapid and sizeable has been the city's business growth. Consider the large increase in the number of telephones—the pulses of city commerce in Toronto. The figures for the past few years are:—

The increase in the number of telephones in service since 1907 is as follows:—

Efficiency

does not consist in loading your mind with facts and figures,

But It Does Consist

in knowing where to locate necessary information quickly when you want it.

Consult your City Directory

It contains more information about the city and its people than any other book.

Efficiency

does not consist in loading your mind with facts and figures,

But It Does Consist

in knowing where to locate necessary information quickly when you want it.

Consult your City Directory

It contains more information about the city and its people than any other book.

Efficiency
does not consist in loading your mind with facts and figures,
But It Does Consist
in knowing where to locate necessary information quickly when you want it.
Consult your City Directory
It contains more information about the city and its people than any other book.

Efficiency

does not consist in loading your mind with facts and figures,

But It Does Consist

in knowing where to locate necessary information quickly when you want it.

Consult your City Directory

It contains more information about the city and its people than any other book.
